

Gro-Maxx, EMP™

ANALYSIS: 4.6ZN-1.0 MN-.13CU-.01B
RECOMMENDED RATE: 2.0 QT/ AC

Gro-Maxx EMP is a combination of minor elements with early growth enhancement products to help stimulate stronger early plant development. Gro-Maxx EMP is non-corrosive, mixes easily, and is readily absorbed by plant roots.

Gro-Maxx EMP was specifically developed for Northwest Ohio soils for needed metals of zinc, manganese, copper and boron along with a fulvic biological and PGR's to balance out the planter's starter 2X2 fertilizer's for stronger healthier crops.

This product is designed to be used with combinations of 10-34-00 and 28%, any other product combinations should be pre-tested before using.

Gro-Maxx EMP™ Promotes:

- * **Vigorous** early root and seedling growth
- * **Stronger** and more uniform seedling growth
- * **Healthier** and more stress resistant plants
- * **Enhanced** uptake of nutrients
