

Ohio Crop Weather

Dry Weather Continued

Favorable weather supported substantial row crop harvest progress last week, according to Ben Torrance, State Statistician, USDA NASS, Ohio Field Office. Topsoil moisture conditions were rated 1 percent very short, 22 percent short, 73 percent adequate, and 4 percent surplus. Statewide, the average temperature for the week ending on November 12 was 48.7 degrees, 5.8 degrees above normal. Weather stations recorded an average of 0.10 inches of precipitation, 0.68 inches below average. There were 6.0 days suitable for fieldwork during the week ending November 12.

Last week's field activities included fertilizer application, lime spreading, and fall tillage. Farmers reported that high corn moisture content continued to slow corn harvest progress in western counties. Sixty-eight percent of **corn** was harvested and the moisture content of corn grain at harvest was 20 percent. Ninety-five percent of **soybeans** were harvested and the moisture content of soybeans at harvest was 13 percent. **Winter wheat** was 90 percent emerged. Winter wheat condition was 86 percent good to excellent, up from the previous week.

Soil Moisture: Week Ending 11/12/23
