

GRO-MOR™ MAVERICK

MATURITY

Medium-Early

PLANT HIGHLIGHTS

- Excellent scab resistance
- Big heads with big yields
- Excellent for straw

PLANT CHARACTERISTICS

Plant Height: Medium

AWN: Beardless

Lodging: 6.0

Winter Hardiness: 8.0

Test Weight: 8.0

Leaf Rust: 7.0

Powdery Mildew: 7.0

SCAB: 8.5

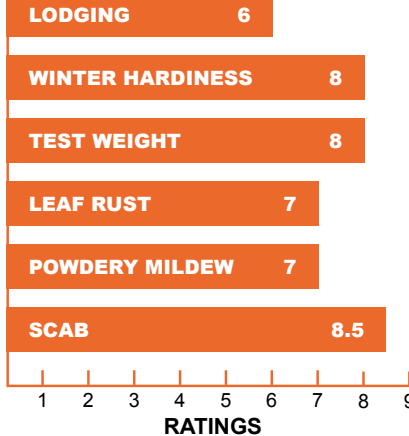

SCAB RESISTANT GENES

There are two types of resistance: *Type I* and *Type II*

Type I: Lowers the initial rate of infection, but does not suppress spreading throughout the field.

Type II: Suppresses or inhibits the spread of the pathogen from the initial infect.

All Gro-Mor varieties carry the Fhb1 gene. This gene provides Type II resistance as well as excellent Type I tolerance developed from decade of breeding and selection.
