

# GRO-MOR™ NOVA

## MATURITY

Medium-Late

## PLANT HIGHLIGHTS

- Responds well to high management for high yields
- For all soils and managements styles
- Excellent SCAB tolerance

## PLANT CHARACTERISTICS

**Plant Height:** Medium-tall

**AWN:** Bearded

**Lodging:** 8.0

**Winter Hardiness:** 8.0

**Test Weight:** 7.0

**Leaf Rust:** 8.0

**Powdery Mildew:** 7.0

**SCAB:** 8.0

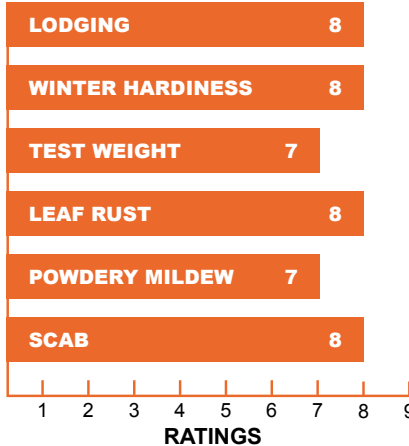

## SCAB RESISTANT GENES

There are two types of resistance: *Type I* and *Type II*

**Type I:** Lowers the initial rate of infection, but does not suppress spreading throughout the field.

**Type II:** Suppresses or inhibits the spread of the pathogen from the initial infect.

*All Gro-Mor varieties carry the Fhb1 gene. This gene provides Type II resistance as well as excellent Type I tolerance developed from decade of breeding and selection.*

Ratings: 5.0 to 9.0  
with 5.0 = Average and 9.0 = Excellent
