

GRO-MOR™ PUMA

MATURITY

Early

PLANT HIGHLIGHTS

- High management high yield
- Early bearded variety with excellent test weight
- For best results use a fungicide for leaf diseases

PLANT CHARACTERISTICS

Plant Height: Medium

AWN: Bearded

Lodging: 7.5

Winter Hardiness: 8.0

Test Weight: 7.0

Leaf Rust: 5.0

Powdery Mildew: 7.0

SCAB: 8.5

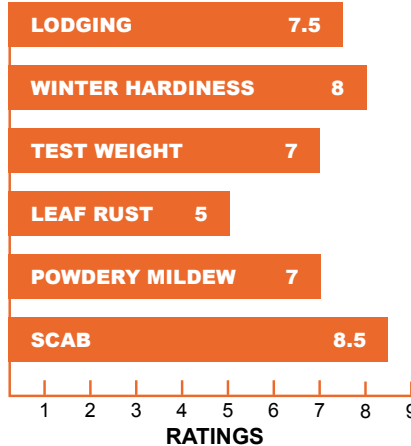

SCAB RESISTANT GENES

There are two types of resistance: *Type I* and *Type II*

Type I: Lowers the initial rate of infection, but does not suppress spreading throughout the field.

Type II: Suppresses or inhibits the spread of the pathogen from the initial infect.

All Gro-Mor varieties carry the Fhb1 gene. This gene provides Type II resistance as well as excellent Type I tolerance developed from decade of breeding and selection.

Ratings: 5.0 to 9.0
with 5.0 = Average and 9.0 = Excellent
